Desktop Publishing

Childcare Management

Human Resources Management

Excellent teachers serve as a powerful influence on even the very youngest children. Early childhood education can help to launch a child's cognitive and social development and provide a vital foundation for future success. The impact of education on our society cannot be overstated. Great, educated graduates can change lives, and here at Laurel, we make great graduates.

Our Early Childhood Education program teaches students techniques for observing and evaluating children's performance, behavior, social development and physical health. Our curriculum also covers numerous aspects of children's development, teaching techniques, literacy and math development, and the understanding of children with special needs.

Our program in Early Childhood Education prepares students to work with children in preschools, daycare centers, and other child development centers. We prepare our Early Childhood Education students to make learning come alive for all students.
